

Abingdon, MD May 3, 2022 – For Immediate Release

REAL LIFE PROSTHETICS™ CELEBRATES 21-YEARS IN HARFORD COUNTY

Real Life Prosthetics celebrates its 21-year anniversary here in Harford County. On May 3, 2001, Jonas Seeberg, CPO/LPO, FAAOP, Founder and President of Real Life Prosthetics, along with William Coleman, CTP, CPA, Vice President, and Sandra Yeater, CFO, opened the Box Hill Corporate Center location in Abingdon, MD. Twenty-one years later, Real Life Prosthetics operates three additional satellite offices located in Chestertown, MD, Towson, MD and Newark, DE with an additional office opening in Wilmington, DE in the next few months.

"I wish all amputees as much success as I have had. By far this is my best experience yet and I owe a lot of thanks and gratitude to Real Life Prosthetics, without these guys it would not be possible. Thank you very much!"

~ Russ W., Real Life Prosthetics Patient since May 2001

This practice has a strong foundation of certified clinical and technical staff who work side-by-side to design, fabricate, and provide cutting-edge artificial limbs and bracing to restore the lives of those faced with amputation and long-term disability. Seeberg, Coleman, and Yeater have 97-years of combined experience in the Orthotics and Prosthetics Industry. Real Life Prosthetics also has a team of dedicated funding and administrative specialists who work closely with each patient to help navigate the confusing world of insurance coverage and scheduling appointments through the rehabilitative process. Although Real Life Prosthetics relies on medical science, engineering, and space-age technology for creating advanced devices, they understand how patients rely on them for personal, dignified care to improve one's quality of life and sense of well-being.

"My life has been restored by Real Life Prosthetics. Everyone there encouraged and supported me. They were there to help me with any problems that I had, and they were there to share in my success."

~ Alisa W., Real Life Prosthetics Patient since March 2003

In the Fall of 2018, Real Life Prosthetics™ was recognized as a New Manufacturer to Harford County by Regional Manufacturing Institute of Maryland, Harford County Office of Community and Economic development and Champions of Manufacturing Gala.

"I am very excited for our team at Real Life Prosthetics and look forward to a bright future! With our expanding team of professionals, technological advances, in-house rehabilitation, in-house manufacturing, and additional locations, we are able to better serve those facing limb loss and disability. Although healthcare has become a very intense ride for O&P providers, our vision remains unchanged as a privately-owned company. We exist to help persons with disabilities lead more active, independent lifestyles, through the use of cutting edge technology and expert clinical care."

~ Jonas Seeberg, CPO/LPO, FAAOP, Founder and President of Real Life Prosthetics
