

# AMPUTEE JOURNEY

The Process of Prosthetic Care with Real Life Prosthetics®

SCAN ME

## PRE-CONSULTATION

BEFORE AMPUTATION SURGERY

Meet with a certified prosthetist to:

- Learn what to expect after surgery
- Review healing & fitting timeline
- Understand prosthetic options & goals

*Early planning sets expectations & improves your outcomes.*

## AFTER AMPUTATION SURGERY

4 - 6 WEEKS

Focus is on recovery with:

- Hospital discharge & transition home
- Staple removal, shrinker socks & limb protection
- Compression therapy for shaping & healing

*This stage builds the foundation for prosthetic success.*

## EVALUATION, DESIGN & FUNDING

2+ MONTHS

The prosthetic process begins with:

- Evaluation & limb assessment
- Custom design for mobility goals
- Prescription & insurance authorization

*Careful planning ensures a prosthesis that fits & supports long-term success.*

## IN-HOUSE FABRICATION

After authorization, your prosthesis is built in our Abingdon, MD lab:

- Order prosthetic components
- Create custom socket from your mold
- Assemble device by our technical team

*On-site fabrication ensures quality, precision & faster turnaround.*

## FIT AND DELIVERY

Your prosthesis is finalized with:

- Prosthetic fitting & dynamic alignment
- Programming, testing & adjustments
- Delivery of completed prosthesis

*This step ensures comfort, function & readiness for daily use.*

## REHABILITATION

Work with a physical therapist to:

- Learn safe movement & build strength
- Regain balance, confidence & independence

*Rehabilitation is key to maximizing function & long-term success.*

Access our **Amputee Rehab Model** with Align Rehabilitation, located next door to our Abingdon Clinic.

## FOLLOW-UP WITH YOUR PROSTHETIST

Regular visits help:

- Monitor limb changes
- Adjust for comfort & performance
- Support proper use & mobility
- Resupply, repair, or replace as needed

*Follow-ups keep you comfortable & moving.*
